

More SEQ Councils on target to reduce DA timeframes

Scenic Rim, Sunshine Coast and Toowoomba Councils are the latest to launch their Target 5 Days Application Kits to the public.

These councils have now joined the growing list of SEQ Councils offering a five day assessment turnaround for most low-risk residential applications, and a speedier assessment process for more complex residential developments.

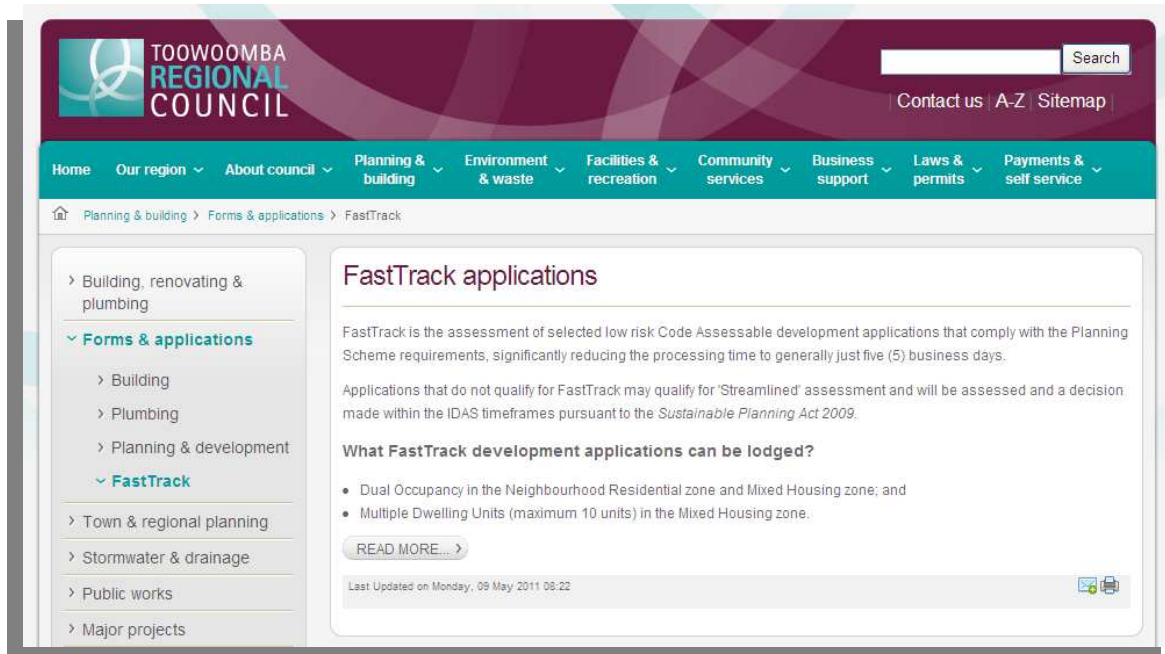

In particular, Toowoomba Regional Council has received an impressive response to the launch of their Application Kits on Monday 9 May. In addition to a number of enquiries regarding the Kits, Council has received positive coverage from various local media outlets.

To coincide with these latest launches, the HAF Programme has commenced an advertising campaign to promote the new Target 5 Days tools and processes to the development industry and the community.

It is hoped that the development industry will continue to support the Target 5 Days project through the use of the new duplex and multi-unit development Application Kits.

Work has already commenced on Phase 2 of the Target 5 Days project, which will deliver a new Application Kit for 'Reconfiguration of a Lot' applications by June 2011.

For more information on the Target 5 Days project, please contact Scott Smith, Project Manager on (07) 3000 2303 or email: scott.smith@hafqld.net.
