LGAQ Data and Analytics Products

Energy Detective

Identify trends and patterns in energy consumption and costs to assist with optimising council processes and potentially address wastage and erroneous usage. Additionally, the product provides benchmarking against other organisations' usage and spend.

Fleet Detective

Understand and optimise costs of your organisations fleet through analysis of your fuel, mileage, telematics and asset management information. Identify anomalies in utilisation of vehicles and improve safety through analysis of vehicle usage and driver behaviours.

Communications Detective

Gain insights to your organisations spend related to communications and internet as well as a greater understanding of your device asset register including contract end dates and usage.

Waste Detective

Utilising data that is provided to the State Government, Waste Detective provides easy to understand analysis of your organisation's waste related activities including the ability to compare with other Queensland councils.

Benchmark Reporting

Compare your councils key performance measures such as Operating Expenditure and Rates and Charges Revenue
